Plan

## Behavioural Escalation

Consider behavioural escalation to determine your most appropriate response.

Touching a person who is physically protective should only be used as a last resort.

# Have you used the Individualized Behavioural Escalation Prevention Plan (IBEPP) Tool?

The IBEPP Tool is based on the Behavioural Escalation Scale in the GPA curriculum (*previous page*). It can help your team identify and share information to recognize, prevent and defuse responsive behaviours by individualizing GPA approaches for each person's needs.

The IBEPP Tool includes a Guide and Template. Download the tool from the [GPA Certified Coach Intranet](#) in the Coach 'Resources' section.

## Watch our Webinar on the IBEPP Tool

For additional instructions and a demonstration of the IBEPP Tool, watch the GPA CC Webinar entitled '*Informal Coaching using the IBEPP Tool*'. Access it on the home page of the [Coach Intranet](#) in the 'GPA Certified Coach Webinars' section.

Don't forget to claim GPA Maintenance hours – 1 GPA direct hour for viewing the IBEPP instructional webinar and up to 20 Informal Coaching hours when using the IBEPP Tool in discussions.

**P.S. While you are on the Coach Intranet, please check your Coach renewal status. Thank you.**
